ePraise COPPA Consent Form Introductory Language

US law requires that schools in the United States must comply with the Children's Online Privacy Protection Act (COPPA). This law requires written parental consent for children under the age of 13 before they can use online services such as ePraise that store any sort of personal information. This information is protected as per the, ePraise Product Privacy Policy, in the Trust Centre.

If you are a teacher or school administrator with students under the age of 13 whose data is stored in ePraise systems, you must notify students' parents and obtain their consent to store their children's data in ePraise.

You can download the ePraise COPPA consent form here. We recommend keeping these forms on file once they are completed.
